Response

1. The response filed on 6/28/2006 has been received and made of record.
2. Applicant's arguments with respect to claims 74-101 have been fully considered and are found to be persuasive. However, double patenting rejections will be maintained until terminal disclaimer is filed.

Double Patenting

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Art Unit: 2157

4. Claims 74-102 are rejected under the judicially created doctrine of double patenting over claims 1-78 of U. S. Patent No. 6,751,670. Although the conflicting claims are not identical, they are not patentably distinct from each other because other than minor obvious variations the comparison made to independent claims 74, 75 and 90 of the instant application and independent claims 27, 32 and 66 of the patented claims reveal that independent claims 27, 32 and 66 of the patented claims are simply species of the broader claims 74, 75 and 90 of the instant application. Hence, claims 74, 75, 90 and 101 of the instant application are generic to the species of the invention covered by claims 27, 32 and 66 of the patent. Thus, the broad generic invention is anticipated by the narrower of the species of the patented invention, thus without a terminal disclaimer, the species claims preclude issuance of the generic application. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993).

Furthermore, there is no apparent reason why applicant was prevented from presenting claims corresponding to those of the instant application during prosecution of the application which matured into a patent. See *In re Schneller*, 397 F.2d 350, 158 USPQ 210 (CCPA 1968). See also MPEP § 804.

As per claims dependent claims 76-89, 91-100 and 102 see dependent claims 28-31, 33-44.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
